Building Technology in the Spirit of Ubuntu

## ABOUT US

iBantu Technologies (Private) Limited is a Zimbabwean technology company registered under the Companies and Other Business Entities Act [Chapter 24:31] (Registration Number 87077A0532026), specialising in software development, industrial and home automation, and Internet of Things (IoT) systems.

iBantu Technologies was conceived out of the need to turn individual, community and corporate discomfort, frustration or inconvenience into tangible solutions that can be scaled, profitably or for the greater good of humanity, in the spirit of “Ubuntu.”

Our goal is to utilise technology as a tool for the betterment of every human's day-to-day experience globally, in a sustainable manner.

## WHAT WE DO

We design, build and deploy practical technology solutions across the following core areas:

- Industrial, home and other automation systems
- WhatsApp chatbots and conversational platforms
- Mobile application development
- Website design and development
- Mechatronics, robotics and Internet of Things (IoT) systems
- Software as a Service (SaaS) platforms, licensed locally and internationally
- Cybersecurity services
- Solar installations

*We serve individuals, communities, businesses, and government — anyone who needs our technology is a client.*

## NOTABLE & LIVE PROJECTS

- **Remote Companies – WhatsApp ChatBot:** A WhatsApp-based company registration platform that guides clients through choosing their country of incorporation, submitting company information and shareholder, director and secretary details, and paying for their application without leaving the chat. An admin workspace brings paid applications together so the team can review, manage and progress each registration. Used in-house and also available for licensing to company-registration agencies internationally.
- **Lost & Found (iOS, Android & Web):** A live platform where people can search for and report misplaced national documents (driver's licences, national ID cards, passports, birth and school certificates), lost baggage, and personal belongings lost at events. An open-source, non-profit project sustained through donations.
- **Script Hive – Movie Scripts Database:** Contributed to a website used worldwide to search for and download movie scripts, including UI components for donations, improved download feedback and page design, and anti-scraping safeguards.
- **MyShoppah:** A mobile till-point solution developed in response to long in-store queues for cashless customers; the working prototype is being refined ahead of wider retail adoption.
- **MoCash Chatbot:** A third-party WhatsApp tool that let clients across Zimbabwe recharge mobile wallet accounts remotely, extending access beyond MWOS's physical branches, ahead of MWOS later launching its own remote recharge feature.
- **Ballot Buddies:** A WhatsApp chatbot built for the 2023 Harmonised Elections Hackathon, providing voter

education and polling station look-up. It won the hackathon and was later adopted, under a different name, for voter education during the 2023 Harmonised Elections.

- **Virtual Suggestion Box:** A mobile app for protecting whistle-blowers, winner of an innovation prize awarded by Atsign (USA) in conjunction with the Computer Society of Zimbabwe.
- **Smart Water Meters:** Smart metering hardware enabling pre-paid water usage.

## LEADERSHIP

### Jim-Frank Skimo Makayikayi — Director

Mechatronics Engineer.

### Luke Sithole — Director

Business Management.

### Ishmael Kudakwashe Makayikayi — Company Secretary

Serves as the Company's Secretary.
